

MINCH

CLEAN WATER HEALTHY LIFE

ንጹህ ውሃ ለጤናማ ህይወት

99.9+% Removal of Bacteria

99.9+% Removal of Protozoa

100% Natural Filtration

Internationally Certified

Durable Aluminum Body

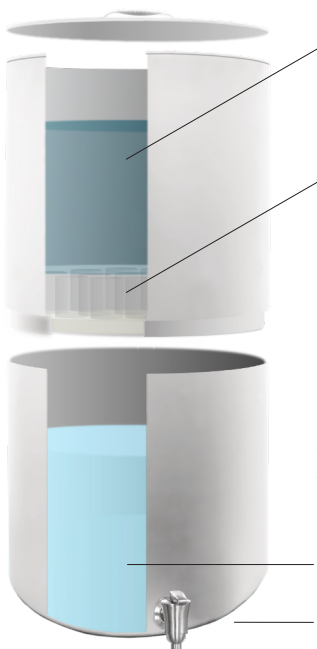

More than 10 years of WASH consulting in Ethiopia...

...inspired the engineer of the MINCH Household Water Filter to develop a water filter that meets the customers' expectations. It gives people safe water but is at the same time nicely designed and prestigious.

A variety of independent field and laboratory tests proved that the proprietary mix of micro scale pores in the MINCH Household Water Filter purifies contaminated water by **removing over 99.9% of harmful bacteria and protozoa** as well as over 99% of viruses. Therefore, the MINCH filter competes with the performance of imported technologies, but is **developed and made in Ethiopia**.

The flow rate of over 2 Liters/hour as well as the internal clean water storage of 14 Liters ensure that MINCH users won't run out of safe water. Additionally, the filter requires only simple cleaning to maintain performance and works free from chemicals and power supply.

12 Liters dirty water storage

Certified Filtration Technology
Works free from chemicals and power supply

Average removal capacity at international certification:

- ✓ E.coli: 99.9999%
- ✓ MS2: 99.9999%
- ✓ Phi X-174: 99.9%

14 Liters safe water storage

Stainless steel tap

An innovative approach to business and sustainability

Not only does a MINCH Household Water Filter serve people at risk by empowering them to purify water in their households, but we design the entire way we do business in Ethiopia to maximize social and economic benefits wherever we see the opportunity.

At this very time, we...

- ...strengthen local markets by ensuring 100% manufacture in Ethiopia.
- ...primarily employ men and women with hearing impairment or other disadvantages in our filter manufacture to create job opportunities for those who face the biggest challenges to gaining work in Ethiopia.

Sustainable Impact

Environmentally Friendly

Socially Responsible

Developed in Ethiopia

Made in Ethiopia

CLEAN WATER, HEALTHY LIFE.
